

Jane Iredale Gets the Skin Cancer Foundation (USA) Seal of Recommendation

Choosing the right **skin care** makeup just got a little bit easier. **Jane Iredale**, one of the leaders in mineral makeup, just received the seal of recommendation from the **Skin Cancer Foundation (USA)**. In order to get the Seal of Recommendation, a product goes through extensive testing and proves to be effective in these areas:

- A sun protection factor (SPF) of 15 or higher
- Validation of SPF number by testing on 20 subjects
- Substantiation for any claims that a sunscreen is water- or sweat-resistant
- Acceptable results for phototoxic reactions and contact irritancy testing on 20 subjects

Five of their most popular products are now approved by the experts to be a highly effective addition to any UV ray-conscious person's skin care and makeup routine.

- Amazing Base (loose powder),
- Pure Pressed Base (pressed powder),
- Dream Tint,
- Lip Drink and
- Powder-Me SPF in Tanned and Translucent

These 5 products are all stamped with the Skin Cancer Foundation's seal, letting everyone know that Jane Iredale is a brand that can be trusted when it comes to serious sun care.

NEW NEW NEW
