

We are now stocking ENVIRON.

Environ® skin care products have been formulated to combat and relieve the harmful effects of the harsh climatic changes of today's environment - specifically pollution and ever-increasing doses of radiation from the sun, due to the thinning of the protective ozone layer. Added to these are the

modern-day effects of social and work stresses and poor diet.

The Environ® products offer a definite regime to nourish, protect and maintain a healthy, youthful and beautiful skin. Each product is made from the highest quality ingredients.

We are very excited to be stocking these products and know that you will love them! Ask us about them next time you are in. *Please note that we are still stocking Dermalogica and Joyce Blok. We have taken on Environ as we know that it will work with and compliment our product ranges.*

Special Offer - 1 Free Skin Rejuvenation Treatment

As we age, the quality of the skin changes - as collagen and elastic fibers degrade and the distribution and function of the body's own hyaluronic acid is less efficient. This results in rougher and drier skin with less elasticity. The biological clock has an important role in this process but also lifestyle factors, such as exposure to sun, smoking and drinking.

The Skin Rejuvenation program is a proven treatment to restore the youthful luster and texture of skin via micro-injections of Hyaluronic acid. Q-Med has developed a range of dermal fillers specifically designed to stimulate collagen and provide long lasting hydration to where it is needed i.e. within the skin.

The treatment provides deep dermal hydration and moisturising from within to improve skin firmness to keep our skin looking plump and hydrated. It diminishes the appearance of fine crepey lines caused by sun damage and counters the effects of air-conditioning systems which leave your skin so dry. If you have previously 'worshipped the sun' this treatment can help restore skin elasticity, smoothness and tone.

It is perfect for treating: Veiny Hands, Crepey sun damaged décolletage and fine chest lines & all areas of the face to improve skin tone and firmness

This treatment is a smooth, crystal clear Hyaluronic acid (HA) gel which is injected into the skin to

replenish the skin's own HA. We all have hyaluronic acid in our skin, it attracts water and plays an important part in the skin's hydration system and the production of healthy looking skin.

The recommended treatment consists of three treatment session of very fine injections spaced four weeks apart. Treatment benefits generally last for around nine months and can be maintained by a single treatment once or twice a year.

Special Offer - 1 Free Skin Rejuvenation Treatment

*Purchase 2 skin rejuvenation treatments with
Dr Ellen Selkon - Juno Clinic and receive the 3rd for free. **

*First 2 treatments must be paid for at 1st visit. Free offer ends 31st July 2010
